## DECENNIAL INDEX

Volumes 1-10

1941-1950

*Editor of Index*

IRICH HIRSCHBERG, Ph D

# Foreword

THE DECENNIAL INDEX is largely based on the yearly indices to the separate volumes. It therefore represents the combined efforts of the former editors of the journal. Two of these editors, Drs. Baldum Lucké and Paul E. Steiner, kept the original entry cards of some of the earlier volumes and graciously put them at our disposal. We are especially indebted to Dr. Erich Hirschberg, the editor of this index, for the tremendous task involved in its preparation. He is responsible for making it more than a compilation of ten annual indices into one large one. He divided it into author and subject indices and made many new additions to the latter. His devotion of many hours to this project will effect a saving in time for many others. Appreciation for this task will accrue for many years.

All original articles are listed. The abstracts of papers presented before the American Association for Cancer Research, 34th-41st Annual Meetings, and at the A A A S Gibson Island Research Conference on Cancer in 1946 are indicated by italics. No entries have been made for book reviews, announcements, abstracts of reports appearing in other journals, or papers presented before the American Association for Cancer Research which are listed in the journal only by title.
